

# AKSAM AKBAR

PRICING & REVENUE ANALYST | ADVANCED EXCEL | SQL | POWER BI

Kochi, India • +91 9539060872 • [aksamakbar@gmail.com](mailto:aksamakbar@gmail.com) • [LinkedIn](#) • [GitHub](#)

## PROFESSIONAL SUMMARY

Results-oriented Pricing & Data Analyst with an MBA in Data Analytics and hands-on experience in revenue forecasting, price performance benchmarking, and margin optimization. Proven proficiency in Excel, Sql for developing variance reports, sensitivity analyses, and executive KPI dashboards. Adept at cross-functional collaboration and driving high-margin commercial outcomes for InMobi.

## WORK EXPERIENCE

### Junior Pricing Analyst | Allianz InfoSoft

Jun. 2025 – Present

Kochi, India

- Develop pricing analyses using SQL and Advanced Excel to evaluate market trends, historical demand, price performance, and margin opportunities.
- Build Power BI dashboards and variance reports to monitor pricing KPIs, price realization, discount compliance, and product margins.
- Conduct competitor benchmarking and cost-structure analysis to support pricing decisions and margin optimization.
- Manage pricing workflows, custom deal requests, and approval tickets through Jira while coordinating with cross-functional teams.
- Prepare revenue forecasts, scenario models, and sensitivity analyses to support data-driven pricing recommendations and business decisions.

### Project Management Associate | Global Survey

Nov. 2024 – Jun. 2025

Mumbai, India

- Managed data-centric projects from planning through delivery, coordinating timelines, stakeholders, resources, and project requirements.
- Built Power BI dashboards to track project KPIs, operational metrics, and financial milestones for management reporting.
- Performed data validation, quality checks, and reporting analysis to maintain data accuracy and reporting integrity.
- Coordinated with cross-functional teams to resolve operational issues, monitor project progress, and support timely delivery.
- Conducted root cause analysis on operational bottlenecks and supported process improvements to enhance project turnaround.

## PROJECTS

### SQL Data Warehouse - Portfolio Project | SQL, Data Modeling, ETL Pipeline

[GitHub](#)

- Architected and deployed a multi-layer modern data warehouse using Medallion Architecture (Bronze, Silver, Gold) within SQL Server to handle end-to-end data pipelines.
- Developed T-SQL ETL processes using automated stored procedures to manage batch processing and ingest raw ERP and CRM data.
- Engineered data cleansing, normalization, and enrichment workflows, designing business-ready Star Schema data models optimized for BI reporting.

### Marketing Analytics - Portfolio Project | SQL, Python, Power BI

[GitHub](#)

- Engineered end-to-end data pipelines by transforming messy e-commerce datasets using SQL Server into optimized relational reporting views.
- Modeled complex text-based review sentiment using a Python VADER NLP model to convert unstructured customer feedback into measurable data metrics.
- Built interactive Power BI dashboards tracking critical business KPIs, including Conversion Rate, Engagement, and Average Order Value.

### Sales Forecasting & Predictive Analytics | Python, Pandas, Seaborn

[GitHub](#)

- Cleaned and preprocessed a retail dataset of 8,500+ records by handling missing values, standardizing inconsistent categories, and deriving new metrics like store age.
- Conducted Exploratory Data Analysis (EDA) using Matplotlib and Seaborn, identifying sales distributions, pricing patterns (MRP), and key drivers across store types.

- Built predictive regression models using Scikit-Learn to estimate product sales and uncover trends across outlet locations and item categories.
